Link or Add an Audio File to a Slide

Link an Audio File to a Slide

In Project Options you can add an Audio File/Clip to a Track and link it to a specific Slide Number.

Project Options	IN BALLING BALLING	Contraction of the	x
Main	Add track Add audio file 💉 🖍	• 00:00	03:30
Audio	Track 1 3:30	Original duration	3:30.596
Control		🔽 Link to slide	4
Screen		Offset	-0:15.000
Transitions		Start time	0:00.000
Defaults		Duration	3:30.596
Advanced		Fade In	0.0
		Fade Out	0.0
		Volume (%)	100 -
		Soundtrack duration Loop the soundtrack Convert tracks to MP3 	3:30.596
	-	Bit rate	256 -
		ОК	Cancel

- The Audio Clip that you wish to link to a Slide should be added to a new track
- If it is added to an existing track containing other audio clips, it is added at the end of the last clip
- In a track containing more than one Audio Clip and possibly a mixture of Linked and Non-Linked Audio Clips, it is not possible to Cross-fade a Linked Clip with either another Linked Clip or a Non-Linked Clip
- To Cross-fade Linked Clips they must be added to Individual Tracks and the fader sliders (or the fade controls in Project Options/Audio) must be used

In the Timeline

- Highlight a Slide
- Right click on an Audio Clip and the option to "Link Audio Clip" to the selected Slide is available
- The Audio Clip can then be positioned by dragging along the Timeline to the desired position
- Linked Audio Clips which are in the same Track cannot be Crossfaded

- The Audio Clip or recorded Voice Comment is added to a newly created "Track for Audio Comments"
- Audio Files or Voice Comments which are added to other slides are also added to this "Track for Audio Comments"
- By default the start time of an Audio File or Voice Comment is the start time of the Slide to which it has been added
- Crossfading of Audio Clips and/or Voice Comments in the Track for Audio Comments is not possible
- Trimming/Cropping and/or Fading can be done in the Timeline and/or in the Projects Options/Audio Tab
