

# Create Custom Transitions

- To Enter the Custom Transition Effect Window click on the AB symbol in a slide or:
- Click on Project Options / Transitions
- Then click on the Manage Transitions button

- Give the Transition a descriptive name
- Choose an existing Category or Type in a New Category Name
- Next, choose a Variant

- E.g. Multi Variant - List

The screenshot shows the 'Create transition effect' dialog box. It has a title bar with a close button (X). The dialog is divided into several sections: 'Common options' with fields for 'Name' (My transition effect) and 'Category' (Custom transitions); 'Storage' with a dropdown for 'Location for this Transition' (In the global storage); 'Variants' with a 'Mode' dropdown (Multiple variants - list) and a row of buttons (+, -, Duplicate, Edit, Rename, up arrow, down arrow); and 'Background of transition' with radio buttons for 'Solid color' and 'Gradient' (selected), and a dropdown for 'Dissolve'. At the bottom are 'OK' and 'Cancel' buttons. The 'Variant 3' text box is highlighted with a blue border.

Create transition effect

Common options

Name: My transition effect
