Choose Background Options and Click on Edit

Single Variant

• The Aspect Ratio is automatically chosen to suit the Project Options AR

Multi Variant - List

×

- Click on "+" to add a Variant to the List
- Click on "-" to Delete a Variant
- Click on Edit to proceed to the Editor
- Close the Editor Window by clicking on the "X" at top right to return to this Window
- Click on OK to Save

Multi Variant - Buttons

×

- Choose a Preset Variant
- Click on an Arrow Button
- Click on Edit to proceed to the Editor
- Close the Editor Window by clicking on the "X" at top right to return to this Window
- Click on OK to Save

After Creating a Custom Transition it would be good practice to Export it to a folder somewhere on your HD called "Exported Slide Styles"

Global vs Embedded Transitions

- The **Global Transitions** section contains both the Preset PTE Transitions and the Custom Transitions which you can Create yourself or Import from the Forum etc.
- The "Manage Transitions" button has a dropdown menu which allows the Option to "Clone" a Custom Transition
- The Cloned Copy can then be either edited to create a Variation or "Moved to the Local Storage" (**Embedded Transitions**)
- When creating a "Backup in ZIP" (BIZ) to export to another PC which might not have the Custom Transition it is included for use when the BIZ is unzipped
- The Global Custom Transitions are Embedded in Executable files
