

Export a Slide Style

In order to share User Styles or transfer them from your main Computer to your Laptop PC etc they first have to be Exported as “ptestyle” files.

- Choose the Style to be Exported.
- Click on Slide Style
- Click on Tools.

The Exported File is then saved in the folder designated in Settings / Preferences / Templates. This can be the default location or can be specified on a drive other than “c:” drive.

The “ptestyle” files can be uploaded to the PicturesToExe forum or sent in Personal Messages as “ptestyle” files. When sending in e-mail they should be Zipped before attachment.
