

# Video Clip Properties

## Properties Tab

- Video - The location of the selected video clip is shown and the Video Clip could be changed here if required
- Main Object - Indicates Main Object of Slide and its index number (1) e.g. for using in a Style
- Edge Anti-aliasing - Reduces the effects of Aliasing - Further reading - [External Link](#)
- Do not include file to exe - Allows the file size to be kept low by linking to an external folder
- Mute Audio - this can also be used when adding the Audio of the Video to an Audio Track to apply an envelope
- De-Interlacing - three options - Further reading - [External Link](#)
- Offset - Off sets the Start of the Video Clip with respect to the Start of the Slide

Clicking on the dropdown menu button of either Start Time or Duration brings up:

*Not available in the Essentials Edition*

- Start Time - Adjustable via the Blue Trim Triangle
- End Time - Adjustable via the Blue Trim Triangle
- Duration - Video Clip Duration
- The “orange” triangle shows the current position (frame) in the video clip

## Slow Motion / Fast Motion

- Speed - The original Speed of the video clip can be changed. Variable between 50% and 100%. Note that it is interactive with Start Time, End Time and Duration (the Start and End Frames do not change)

## Single Video / Master Video

- Single Video Clip plays only for the duration of the current slide
- Master Video track - If the same video is added to multiple slides the first instance of the video can be set to Master Video Track. All further instances on subsequent slides can be set to “Link to <the Master Video Track>”. The result is a Video clip running continuously over multiple slides.

## Chroma Key

- See [Chroma Key](#) article

## Adjust Video and Border

- Same as "[Adjust Image and Border](#)"
